Introduction	2
Preparation For Downloading	3
Downloading Your Patch	5
Replacing your patch	7
Block Steam updates to the game	9

Introduction

This guide describes how to download play any Far Cry 4 patch. Note that this uses the Steam library of games, so it most likely will not work if you have Far Cry 4 on Ubisoft Connect.

- This is not an officially supported way of downpatching, so if anything goes wrong with your install, it is possible you will have to reinstall Far Cry 4.
- I also highly suggest making backups of your save files before starting.
- Save files can be found here (in my case):

C:\Program Files (x86)\Ubisoft\Ubisoft Game Launcher\savegames*UBISOFT-ID*\856

Preparation For Downloading

This section describes how to find the information you need to download the exact patch you want. However, I have already gathered this information for Far Cry 4, so feel free to skip to the next section, "downloading your patch".

- 1. Go to https://steamdb.info/
- 2. Search for the game you want to download old patches for.

3. Note down the "App ID" at the top of this page.

🚑 Far Cry 4		Follow Ignore Sowned Swatch
App ID	298110	A. A.
Арр Туре	Game	FARCRYA
Store Name	Far Cry® 4	A A A A A A A A A A A A A A A A A A A
Developer	Ubisoft Montreal, Red Storm, Shanghai, Toronto, Kiev	
Publisher	Ubisoft	
Franchise	Far Cry	↑43,553 ↓8,38 4 In-Game

Game: Far Cry 4

4. Click on "depots" and find the depot that has the game files. This should be the largest depot in the list, and should also correspond to the size of the game data in your game install directory.

- 5. Note down the depot ID (298111 in this case) and click on it.
- 6. Click on "manifests" and sign in with your Steam account to see all available manifests.
- 7. Note down the manifest ID of the patch you want to download.

Downloading Your Patch

If you have followed steps 3, 5 and 7 above, you should have the following information:

- App ID (game)
- Depot ID (game version on steamdb)
- Manifest ID (patch version)

Here is a list of all manifest IDs for Far Cry 4. The version numbers are incomplete, as I would need to download each manifest to see what version number it is, so forgive me for that \bigcirc

FC4 App ID: 298110

Depot ID: 298111

Version	Date uploaded to steamdb	Manifest ID
	2023-05-11	4429920567751784363
	2023-05-04	8712821310617904066
v1.10.0	2019-03-27	8102166757232787903
	2019-02-07	8344263975268106394
	2015-04-15	4216825038597302870
	2015-03-10	6912315907868922475
	2015-02-12	1327951833678163177
v1.8.0	2015-02-04	7001947080991410889
v1.7.0	2015-01-27	5728257023545725334
v1.7.0	2015-01-13	6324729009992126217
	2014-12-26	2686697146620978714
v1.5.0	2014-12-08	8185591839703607505
v1.4.0	2014-11-24	7166150939100616058
	2014-11-19	3982836821996568970
	2014-11-17	7285908020511073819

- 1. Press "Windows+R" to open "run".
- 2. Put this into the field and press "OK". This will open your Steam Console.

steam://nav/console

💷 Kør	×
	Skriv navnet på et program, en mappe, et dokument eller en internetressource, som derefter åbnes.
Å <u>b</u> n:	steam://nav/console 🗸 🗸
	OK Annuller <u>G</u> ennemse

3. Run the following command in the console, replacing MANIFEST_ID with the ID of the patch you wish to download.

Download_depot 298110 298111 MANIFEST_ID

4. Your console should now say this. It will not be apparent that anything is happening, but if you open your task manager, you can see that your PC is downloading.

] download_depot 298110 298111 7166150939100616058 Downloading depot 298111 (17680 MB) ...

5. When the download is complete, you will get this message in the console, showing you the location of the game files:

Depot download complete : "C:\Program Files (x86)\Steam\steamapps\content\app_298110\depot_298111" (221 files, manifest 7166150939100616058)

Author:	Game:	Last updated:
Binslev	Far Cry 4	09-03-2024 (DD-MM-YYYY)

Replacing your patch

Before you start replacing anything, I highly suggest you make copies of both the downloaded manifest, and your current game install. This will require about 30 GB per copy.

1. Go to the path provided by the Steam Console and rename it. Then, when you download another Manifest, it will just make a new folder named "depot_298111".

- 🛃 - = app_298110				_	×
Fil Hjem Del Vis					~ ?
← → · ↑ 📙 C:\Program Files	(x86)\Steam\steamapps\content\app_298110	✓ ひ Søg i app_298110			,c

Speedrun	depot_298111_v1.7	09-03-2024 10:06	Filmappe		
Streaming	*				

2. Go to your game install folder:

C:\Program Files (x86)\Steam\steamapps\common

3. Make a copy of the "Far Cry 4" folder in the same directory, or wherever else you fancy.

эрр	s > common v Ö	Søg i common)

4. Copy everything **from** your manifest download folder:

C:\Program Files (x86)\Steam\steamapps\content\app_298110\depot_298111_v1.4

- **To** your game install directory.

C:\Program Files (x86)\Steam\steamapps\common\Far Cry 4

- And select "replace files at the destination".

Block Steam updates to the game

You will also need to stop Steam from updating the game, as it can otherwise overwrite the files you have placed there.

1. Go to your steamapps folder, where your game data is stored:

C:\Program Files (x86)\Steam\steamapps

- 2. Find the "appmanifest_XXXXXX.acf" file. The number is the App ID of your game, which you found earlier in the guide (FC4 = 298110)
- 3. Right click the file, and open with>notepad, or some other text editor.

And that's it! You should now be able to play the game with the patch of your choice. You can see what version of FC4 you are playing in the bottom left of the main menu.

If anything goes wrong, simply copy all the content of the "Far Cry 4 – copy" folder from step 3, into the "Far Cry 4" folder.
